

STRUCTURAL STEEL I-BEAM SPECIFICATION

Designation: IPE 200

Material: Grade S355 Steel

Standard: EN 10025-2

Finish: Hot Rolled, Mill Finish

CROSS-SECTION DIMENSIONS:

Height (h): 200mm

Flange Width (b): 100mm

Web Thickness (tw): 5.6mm

Flange Thickness (tf): 8.5mm

Root Radius (r): 12mm

Standard Length: 6000mm

MECHANICAL PROPERTIES:

Yield Strength: 355 MPa minimum

Tensile Strength: 470-630 MPa

Section Modulus: 194.3 cm³

Moment of Inertia: 1943 cm⁴

Weight: 22.4 kg/m

APPLICATIONS:

- Building construction frameworks
- Industrial platform structures
- Bridge construction
- Heavy machinery supports
- Load-bearing structural elements

TOLERANCES:

Height: ± 2.0 mm

Width: ± 1.5 mm

Web/Flange Thickness: ± 0.5 mm

Length: +50mm/-0mm

Drawing Scale: Cross-section 1:2

Date: 2024

Revision: A
